

Contents

	Preface	xv
1	Models for Mobile Agent Computing	1
	1.1 Introduction	1
	1.1.1 What is a Mobile Agent? 2	
	1.1.2 Why Mobile Agents? 2	
	1.2 An Algorithmic Model for Mobile Agents	3
	1.2.1 Mobile Agents 4	
	1.2.2 Distributed networks 5	
	1.2.3 Resource measures 6	
	1.3 Mobile Agent Rendezvous	6
	1.4 Outline of the Book	7
	1.5 Comments and Bibliographic Remarks	8
2	Deterministic Rendezvous in a Ring	9
	2.1 Introduction	9
	2.2 A Single Stationary Token	10
	2.2.1 The Feasibility of Rendezvous 11	
	2.2.2 The Time Complexity of Rendezvous 14	
	2.2.3 Memory Tradeoff for Rendezvous with Detection 18	
	2.2.4 Limits to the Memory Trade-off 20	
	2.3 Movable Tokens	21
	2.4 Comments and Bibliographic Remarks	26
3	Multiple Agent Rendezvous in a Ring	27
	3.1 Introduction	27
	3.2 Impossibility of Rendezvous	28

3.3	Rendezvous with Detection	28
3.4	Conditional Solutions	32
3.5	Comments and Bibliographic Remarks	33
4	Randomized Rendezvous in a Ring	35
4.1	Introduction	35
4.2	Random Walk Algorithm	36
4.3	Randomization and Tokens	37
4.4	Time/Memory Trade-offs	38
4.4.1	Coin Half Tour Algorithm	38
4.4.2	Approximate Counting Algorithm	39
4.5	Comments and Bibliographic Remarks	40
5	Other Models	41
5.1	Introduction	41
5.2	Leader Election and Rendezvous	41
5.3	Rendezvous with Failing Tokens	42
5.3.1	Rendezvous When Tokens Fail Upon Release	43
5.3.2	Rendezvous When Tokens Can Fail At Any Time	46
5.3.3	The Cost of Token Failure	50
5.4	Flickering Tokens	50
5.5	Asynchronous Rendezvous	54
5.6	Look-Compute-Move	55
5.6.1	Model and Terminology	55
5.6.2	Impossibility Results	59
5.6.3	Gathering Configurations with a Single Multiplicity	61
5.6.4	Gathering Rigid Configurations	61
5.6.5	Gathering an Odd Number of Robots	63
5.7	Dangerous Networks	67
5.7.1	Black-Hole Search in an Asynchronous Ring	67
5.7.2	Rendezvous in Asynchronous Rings in Spite of a Black-Hole	72

5.8	Comments and Bibliographic Remarks	73
6	Other Topologies	77
6.1	Introduction	77
6.2	Synchronous Torus	77
6.2.1	Memory Lower Bounds for Rendezvous	79
6.2.2	Rendezvous Algorithms	81
6.3	Trees	89
6.4	Arbitrary Graphs	90
6.5	Comments and Bibliographic Remarks	91
	Bibliography	93
	Glossary	101
	Authors' Biographies	103
	Index	105
